

The Only Name In Garnet Removal

It's not an accessory, it's a necessity!

All it takes:

8 square feet near the water jet

20 minutes to install

Approximately **30 minutes** to pre-charge and your Extractor is ready to go. No need for electrical or plumbing connections. Just a simple air hose connection is required for operation!

When The Extractor is full of garnet, simply use the forklift sleeves to carry The Extractor to the disposal area, lower the drop door and the dry garnet falls out! **NO MESS!!**

The Extractor Benefits:

The Extractor will save your company thousands of dollars every year in wages, downtime, and disposal costs. The Extractor improves employees' safety by not having to shovel and lift heavy containers of wet garnet weighing hundreds of pounds.

The Extractor does not need expensive electrical or plumbing devices at all

The XR2500 holds 2,500 pounds of garnet (check your forklift capacity)

The XR2000 holds 2,000 pounds of garnet (check your forklift capacity)

The XR1500 holds 1,500 pounds of garnet (check your forklift capacity)

Simple but ingenious...

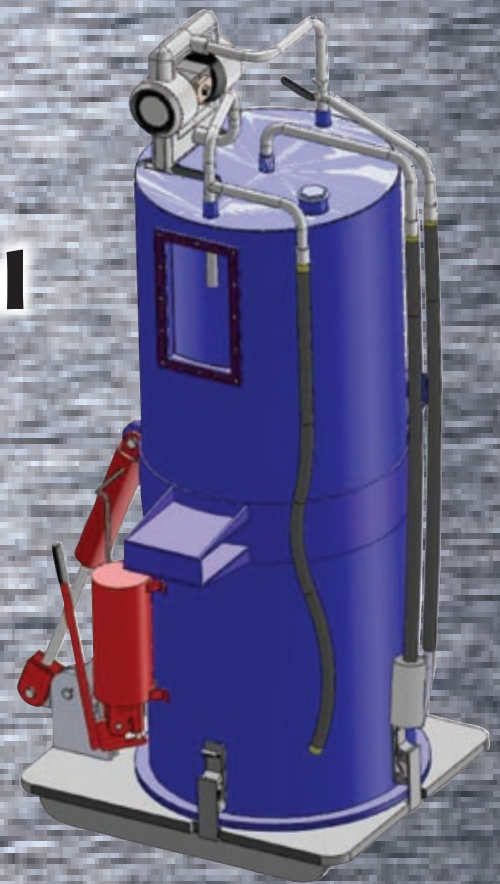

The innovative Extractor removal system was developed out of necessity by a shop owner that purchased a water jet cutting machine. After taking the machine offline for the first time, having employees spend two entire days removing and drying the garnet for disposal, they knew there had to be a better way. The Extractor is the result!

Performing maintenance and cleaning the reservoir tank while not losing production time are critical for every water jet owner. The Extractor fills this need.

The development of The Extractor has revolutionized garnet removal by saving time and money. No more having to deal with sludge and mud all over the shop. This is a clean and easy way to remove garnet.

One important safety benefit is minimizing potential physical injury while manually removing garnet.

There is no doubt that The Extractor is a "Win Win" for your shops' production time and your employees' safety!

- Begin using immediately
- Easy installation
- Easy operation
- No need to install electrical or plumbing
- There is no downside from the moment you start using "The Extractor"
- **THE EXTRACTOR IS NOT AN ACCESSORY, IT'S A NECESSITY**
- No downtime while cleaning your water jet
- The Extractor and the water jet work together continuously throughout the day
- Inspection window for monitoring progress
- No waiting for the garnet to dry before disposal
- Easy disposal using forklift (check your forklift capacity)
- **NO MORE DREADING WATER JET CLEANING DAY!**
- Leasing available
- Patent pending
